Report on Gate Coaching Classes

The Computer Science and Engineering Department of JCT College of Engineering and Technology, Pichanur, Coimbatore has organized 10 days GATE Coaching classes for our department students from 8.01.18 to 22.01.18.

Dr.G.Rajiv Suresh Kumar Head of the department welcomed the gathering

The following Subjects are handled in Gate Coaching Classes.

Engg Mathematics	Theory of computations
Programming in C	Mobile Computing
Data Structure	Object oriented Analysis and Design
Operating System	Network security
Object Oriented Programming	Artificial Intelligence
Database Management System	Distributed System
Design and Analysis of Algorithm	Grid and cloud Computing
Computer architecture	Operational Reserach
Computer Networks	Appitude

The GATE coaching classes went a great success under the support of our department Faculty members and advice of Dr.G.Ramesh, our principal.

In this juncture, we thank our Shri.R.Durga Shankar, Secretary of our JCT College of engineering and technology, for his moral enragement and support.

Report on Gate Coaching Classes

The Civil Engineering Department of JCT College of Engineering and Technology, Pichanur, Coimbatore has organized 10 days GATE Coaching classes for our department students from 4.01.17 to 20.01.17

Mr.A. Kumar, Head of the department welcomed the gathering

The following Subjects are handled in Gate Coaching Classes.

Engg Mechanics	Transportation Engg
Engg Mathematics	Design of reinforced concrete elements
Solid Mechanics	Steel structures
Construction materials and management	Prestressed concrete
Structural analysis	Surveying
Soil mechanics	Municipal solid waste management
Foundation engg	Environmental Engg
Fluid mechanics	Irrigation engg
Applied hydrualic engg	Appitude

The GATE coaching classes went a great success under the support of our department Faculty members and advice of Dr.G.Ramesh, our principal.

In this juncture, we thank our Shri.R.Durga Shankar, Secretary of our JCT College of engineering and technology, for his moral enragement and support.

Report on Gate Coaching Classes

The Computer Science and Engineering Department of JCT College of Engineering and Technology, Pichanur, Coimbatore has organized 10 days GATE Coaching classes for our department students from 4.01.17 to 20.01.17

Dr.G.Rajiv Suresh Kumar Head of the department welcomed the gathering

The following Subjects are handled in Gate Coaching Classes.

Engg Mathematics	Theory of computations
Programming in C	Mobile Computing
Data Structure	Object oriented Analysis and Design
Operating System	Network security
Object Oriented Programming	Artificial Intelligence
Database Management System	Distributed System
Design and Analysis of Algorithm	Grid and cloud Computing
Computer architecture	Operational Reserach
Computer Networks	Appitude

The GATE coaching classes went a great success under the support of our department Faculty members and advice of Dr.G.Ramesh, our principal.

In this juncture, we thank our Shri.R.Durga Shankar, Secretary of our JCT College of engineering and technology, for his moral enragement and support.

Report on Gate Coaching Classes

The Civil Engineering Department of JCT College of Engineering and Technology, Pichanur, Coimbatore has organized 10 days GATE Coaching classes for our department students from 28.12.15 to 9.01.16.

Mr.A. Kumar, Head of the department welcomed the gathering

The following Subjects are handled in Gate Coaching Classes.

Engg Mechanics	Transportation Engg
Engg Mathematics	Design of reinforced concrete elements
Solid Mechanics	Steel structures
Construction materials and management	Prestressed concrete
Structural analysis	Surveying
Soil mechanics	Municipal solid waste management
Foundation engg	Environmental Engg
Fluid mechanics	Irrigation engg
Applied hydrualic engg	Appitude

The GATE coaching classes went a great success under the support of our department Faculty members and advice of Dr.G.Ramesh, our principal.

In this juncture, we thank our Shri.R.Durga Shankar, Secretary of our JCT College of engineering and technology, for his moral enragement and support.

Report on Gate Coaching Class

The Electrical and electronics engineering department of JCT College of Engineering and Technology, Pichanur, Coimbatore has organized 10 days GATE Coaching classes for our department students from 01.02.2016 to 11.02.2016

Prof V.Jethose , Head of the department welcomed the gathering

The following Subjects were handled in Gate Coaching Classes.

SUBJECT HANDLED	NAME OF THE FACULTY
Engineering Mathematics	Shanmuga Priya R
Electrical Machines - I	Pavithra S
Electrical Machines - II	Saravanan M.D
Control Systems	Umarmuktar S
Measurements and Instrumentation	Madeshwari J
Power Electronics	Dr.Anbalagan T
Power System Analysis	Sakthivel C
Digital Signal Processing	Priyadharshini T
Protection and Switchgear	V.Jethose
Electromagnetic Theory	Ravivarman G

The GATE coaching classes went a great success under the support of our department Faculty members and advice of Dr.G.Ramesh, our principal.

In this juncture, we thank our Shri.R.Durga Shankar, Secretary of our JCT College of engineering and technology, for his moral enragement and support.

Report on Gate Coaching Classes

The Computer Science and Engineering Department of JCT College of Engineering and Technology, Pichanur, Coimbatore has organized 10 days GATE Coaching classes for our department students from 28.12.14 to 10.01.15.

Mr.G.Rajiv Suresh Kumar Professor/Head of the department welcomed the gathering

The following Subjects are handled in Gate Coaching Classes.

Engg Mathematics	Theory of computations
Programming in C	Mobile Computing
Data Structure	Object oriented Analysis and Design
Operating System	Network security
Object Oriented Programming	Artificial Intelligence
Database Management System	Distributed System
Design and Analysis of Algorithm	Grid and cloud Computing
Computer architecture	Operational Reserach
Computer Networks	Appitude

The GATE coaching classes went a great success under the support of our department Faculty members and advice of Dr.G.Ramesh, our principal.

In this juncture, we thank our Shri.R.Durga Shankar, Secretary of our JCT College of engineering and technology, for his moral enragement and support.

Report on Gate Coaching Classes

The Civil Engineering Department of JCT College of Engineering and Technology, Pichanur, Coimbatore has organized 10 days GATE Coaching classes for our department students from 27.12.14 to 10.01.15.

Mr.A. Kumar, Head of the department welcomed the gathering

The following Subjects are handled in Gate Coaching Classes.

Engg Mechanics	Transportation Engg
Engg Mathematics	Design of reinforced concrete elements
Solid Mechanics	Steel structures
Construction materials and management	Prestressed concrete
Structural analysis	Surveying
Soil mechanics	Municipal solid waste management
Foundation engg	Environmental Engg
Fluid mechanics	Irrigation engg
Applied hydrualic engg	Appitude

The GATE coaching classes went a great success under the support of our department Faculty members and advice of Dr.G.Ramesh, our principal.

In this juncture, we thank our Shri.R.Durga Shankar, Secretary of our JCT College of engineering and technology, for his moral enragement and support.

SOFT SKILLS

What do you mean by hard skills?

Hard skills are specific, teachable abilities that can be defined and measured, such as typing, writing, math, reading and the ability to use software programs. By contrast, soft skills are less tangible and harder to quantify, such as etiquette, getting along with others, listening and engaging in small talk.

Examples of hard skills include:

Proficiency in a foreign language

A degree or certificate

Typing speed

Machine operation

Computer programming

These hard skills are often listed in your cover letter and on your resume, and are easy for an employer or recruiter to recognize.

Soft skills, on the other hand, are subjective skills that are much harder to quantify. Also known as "people skills" or "interpersonal skills," soft skills relate to the way you relate to and interact with other people.

Top 10 Hard Skills List & Examples

When building your resume or preparing for an interview, having a list of your hard skills is essential. Consider incorporating some of the examples compiled by our experts below in your resume:

1. ***Computer Technology***

In today's world, all employees must possess at least a basic grasp of computer technology, and many companies require candidates to apply for jobs using technology-based platforms.

Show your prospective employer that you are prepared to embrace the technologies needed to perform your job effectively. BusinessNewsDaily.com recommends these seven skills as important technology-related hard skills examples to put on a resume:

- Microsoft Office Suite
- Social media
- HTML
- Analytics
- Pivot tables

2. ***Hard Communication Skills***

While effective communication is often viewed as a soft skill, there are several ways that your comm strengths as a communicator can be demonstrated. Effectively showcasing your communication sk can help you stand out from other candidates.

Take a look at the following examples of hard communication skills you could put on your resume:

- Foreign language
- Digital communication
- Copywriting

3. ***Data Analysis***

Data analysis skills are highly valued across a wide variety of industries – not just in finance. The abil to analyze data and then use that information for the benefit of your company is extremely useful.

From a financial perspective, employees who care about the company's bottom line are highly value If you're good at eliminating waste and can demonstrate you can make the most of the compan dollar and time, include resource management on your resume.

If you have abilities in these areas, be sure to share that with your prospective employer:

- Data mining
- Data presentation
- Resource management
- Data engineering
- Database management
- Any use of data to explore a problem or make a decision

4. ***Certifications and Licenses***

While they may not be hard skills themselves, certifications and licenses are perfect for proving potential employers that you possess certain sought after abilities.

If you have any that are specific to the job or industry you are applying to, you should always cle showcase them on your resume.

Some common types of certifications and licenses include:

- Learning management systems, such as Blackboard, Canvas, or Eagle
- Data management systems, such as Colleague

Scanned by CamScanner

- Healthcare related licenses
- Certificates, awards, badges, and industry-recognized credentials

5. *Marketing*

The ability to convince consumers to purchase a company's products or services will always be invaluable to potential employers. After all, success in marketing directly correlates to an increase in revenue.

There are a number of hard marketing skills that have become incredibly sought after in recent years:

- Search Engine Optimization (SEO)
- Search Engine Marketing (SEM)
- Marketing Campaign Management
- Google Analytics
- Content Management Systems (CMS), such as WordPress

6. *Project Management*

Project management is a profession that now spans across a wide-variety of industries, including information technology, healthcare, and construction. Because of this, the skills related to managing projects have become extremely valuable to many employers.

Some important hard project management skills include:

- Agile Methodologies, such as Scrum
- Project Management Software, such as Trello and Zoho

7. *Design*

While being artistically talented is a natural ability, there are certain design elements and tools that must be learned through education or training. As technology has advanced, consumer's standards for design aesthetics has also increased.

This is both a boon and a curse for all types of designers. While it means your skills are more in demand, it also means there are a number of new tools you might need to learn in order to build a successful career.

Here are some examples of some of the hard design skills most desired by employers:

- User Interface (UI) Design
- User Experience (UX) Design
- Adobe Creative Suite (Photoshop, In Design, etc.)

- Risk Assessment
- Cryptography
- Virtual and Host-based Firewalls

What do you mean by soft skills?

Soft skills is a synonym for "people skills." The term describes those personal attributes that indicate a high level of emotional intelligence. Unlike hard skills, which describe a person's technical skill set and ability to perform specific tasks, soft skills are broadly applicable across job titles and industries.

Examples of soft skills include:

Communication.

Flexibility/Adaptability.

Leadership.

Motivation.

Patience.

Persuasion.

Problem Solving Abilities.

Time Management

Work Ethic

Teamwork.

Interpersonal Skills.

The Difference between Hard Skills and Soft Skills

Hard skills are teachable abilities or skill sets that are easy to quantify. Typically, you'll learn hard skills in the classroom, through books or other training materials, or on the job.

Top Skills Employers Look For

While certain hard skills are necessary for any position, employers increasingly look for job applicants with particular soft skills. This is because, while it is easy for an employer to train a new employee in a particular hard skill (such as how to use a certain computer program), it is much more difficult to train an employee in a soft skill (such as patience).

Scanned by CamScanner

Here's a list of some of the top skills employers seek in candidates for employment. Incorporate these skills into your resume, cover letters, and mention them during job interviews.

Emphasize Both Hard and Soft Skills

During the job application process, you should therefore be sure to emphasize both your hard and soft skills. This way, even if you lack a particular hard skill required by the company, you can emphasize a particular soft skill that you know would be valuable in the position.

For example, if the job involves working on a number of group projects, be sure to emphasize your experience and skill as a team player and your ability to communicate with team members.

How to Highlight Your Skills

You'll want to make sure potential employers are aware of your skills throughout the job application process. This means highlighting your hard and soft skills on your resume and cover letter, and also weaving in mentions of your skills during job interviews.

Incorporate skills into your resume. On your resume, you can include a skills sectionthat lists out relevant skills. As well, you can point to your skills in job description. For instance, if you're applying for a job where you'll need to have legal knowledge, and also communicate with clients successfully, you can include similar experience in job descriptions.

Include relevant skills in your cover letter. Your cover letter is also an opportunity to highlight both sets of skills. When it comes to soft skills, however, rather than saying you have a soft skill, demonstrate that you have it. For instance, rather than saying "I have leadership skills," you can say, "At my role at Company ABC, I steered the sales team to record numbers, creating a bonus structure that generated strong results."

Share your skills during job interviews. During interviews, the STAR interview response technique can help you show off soft skills.

Review Skills List

But which skills should you highlight? Browse through this list of skills for resumes, cover letters, and interviews, employment skills for a variety of different types of jobs, and information on job specific skills, to get inspiration for which skills to highlight during the job application process.

As well, read the job description carefully to get a sense of which skills the employer is looking for in applicants. Finally, there are some skills that you shouldn't include. Review a list of skills not to put on your resume.

Soft Skills List – Self Management Skills

Self-Management Skills address how you perceive yourself and others, manage your personal habits and emotions and react to adverse situations. Only when you build inner excellence can you have a strong mental and emotional foundation to succeed in your career.

Scanned by CamScanner

1. **Growth mindset** – Looking at any situation, especially difficult situations, as an opportunity for you to learn, grow, and change for the better. Focusing your attention on improving yourself instead of changing others or blaming anyone.

2. **Self-awareness** – Knowing and understanding what drives, angers, motivates, embarrasses, frustrates, and inspires you. Being able to observe yourself objectively in a difficult situation and understand how your perceptions of yourself, others, and the situation are driving your actions.

3. **Emotion regulation** – Being able to manage your emotions, especially negative ones, at work (e.g. anger, frustration, embarrassment) so you can think clearly and objectively, and act accordingly.

4. **Self-confidence** – Believing in yourself and your ability to accomplish anything. Knowing that all you need is within you now. "Those who believe in themselves have access to unlimited power" – wisdom from Kung Fu Panda

5. **Stress management**– Being able to stay healthy, calm, and balanced in any challenging situations. Knowing how to reduce your stress level will increase your productivity, prepare you for new challenges and supports your physical and emotional health, all of which you need for a fulfilling, successful career.

6. **Resilience** – Being able to bounce back after a disappointment or set back, big or small, and continue to move onward and upward.

7. **Skills to forgive and forget**– Being able to forgive yourself for making a mistake, forgive others that wronged you, and move on without "mental or emotional baggage." Freeing your mind from the past so you can focus 100% of your mental energy on your near and long-term career goals.

8. **Persistence and perseverance** – Being able to maintain the same energy and dedication in your effort to learn, do, and achieve in your career despite difficulties, failures, and oppositions.

9. **Patience** – Being able to step back in a seemingly rushed or crisis situation, so you can think clearly and take action that fulfills your long term goals.

10. **Perceptiveness** – Giving attention to the unspoken cues and developing cognitive or emotional empathy of other people's situation and perspective. Often times, we are too busy thinking about ourselves and what we are saying, we leave little room to watch and understand others' action and intentions. If you misinterpret other's intention or don't try to put yourself in their shoes, you can easily encounter difficulties dealing with people and not even know why.

Soft Skills List – People Skills

People Skills address how to best interact and work with others so you can build meaningful work relationships, influence others perception of you and your work, and motivate their actions. I have split them into two sections – Conventional and Tribal

Conventional – List of people skills you can find in most job descriptions and you will be assessed on some or all of these in your performance reviews depending on your level.

Scanned by CamScanner

1. **Communication skills** – Being able to actively listen to others and articulate your ideas in writing and verbally to any audience in a way where you are heard and you achieve the goals you intended with that communication. This also include languages skills if the spoken language at work is your second language.

2. **Teamwork skills** – Being able to work effectively with anyone with different skill sets, personalities, work styles, or motivation level to achieve a better team result.

3. **Interpersonal relationship skills** – Effective at building trust, finding common ground, having emotional empathy, and ultimately building good relationships with people at work and in your network. Also referred as you social skills, this skill is closely related to Communication Skills. It doesn't matter how smart you are, you must have social graces in order to get far in your career. As Maya Angelou said "I have learned people will forget what you said. People will forget what you did, but people will never forget how you make them feel."

4. **Presentation skills** – Effectively presenting your work results and ideas formally to an audience that captivates their attention, engage their input, and motivates them to act in accordance to your desired outcome. While presentation skills is a form of communication skills, I decided to list it separately given the ability to present plays a huge role in any business profession especially as you move up in your career.

5. **Meeting management skills** – Leading a meeting to efficiently and effectively reach productive results. At least 50% of meetings today are a waste of time.

6. **Facilitating skills** – Being able to coordinate and solicit well represented opinions and feedback from a group with diverse perspectives to reach a common, best solution.

7. **Selling skills** – Building buy-in to an idea, a decision, an action, a product, or a service. This is not just for people in sales.

8. **Management skills** – Creating and motivating a high performing team with people of varied skills, personalities, motivations, and work styles.

9. **Leadership skills** – Defining and communicating vision and ideas that inspires others to follow with commitment and dedication.

10. **Mentoring / coaching skills** – Providing constructive wisdom, guidance, and/or feedback that can help others further their career development

"Tribal" – List of people skills that you will not find in any job descriptions. They are also essential to your career success. I call it tribal because they are more "insider knowledge" that you gain from work experience or from mentors. Some people can go through their entire career and not be aware of some of these skills.

11. **Managing upwards** – Proactively managing your relationship with your boss, his expectations of your work, and his perception of your performance. Whether you are challenged, given opportunities,

Scanned by CamScanner

or recognized at work heavily depends on your ability to communicate, manage expectations, and build a good relationship with your boss.

12. **Self-promotion skills** – Proactively and subtly promoting your skills and work results to people of power or influence in your organization and network. It is not enough that your boss knows you do great work. You need to subtly build your reputation with all key people that can influence your performance review. This is because hard work alone does not guarantee success.

13. **Skills in dealing with difficult personalities** – Being able to still achieve the work result needed while working with someone whom you find difficult.

14. **Skills in dealing with difficult/unexpected situations** – Being able to stay calm and still are effective when faced with an unexpected or difficult situation. This includes being able to think on your feet and articulate thoughts in an organized manner even when you are not prepared for the discussion or situation you are in.

15. **Savvy in handling office politics** – Being able to understand and proactively deal with the unspoken nuances of office and people dynamics so you can protect yourself from unfairness as well as further your career. Office politics is a fact of life. If you don't choose to play, it can play you.

16. **Influence / persuasion skills** – Being able to influence perspectives or decision making but still have the people you influence think they made up their own minds.

17. **Negotiation skills** – Being able to understand the other side's motivations and leverage and reach a win-win resolution that you find favorably, satisfies both sides, and maintains relationships for future interactions.

18. **Networking skills** – Being able to be interesting and interested in business conversations that motivate people to want to be in your network. The bigger and stronger the network you have, the more easily you can get things done (e.g., find a job, get advice, find business partners, find customers, etc...)

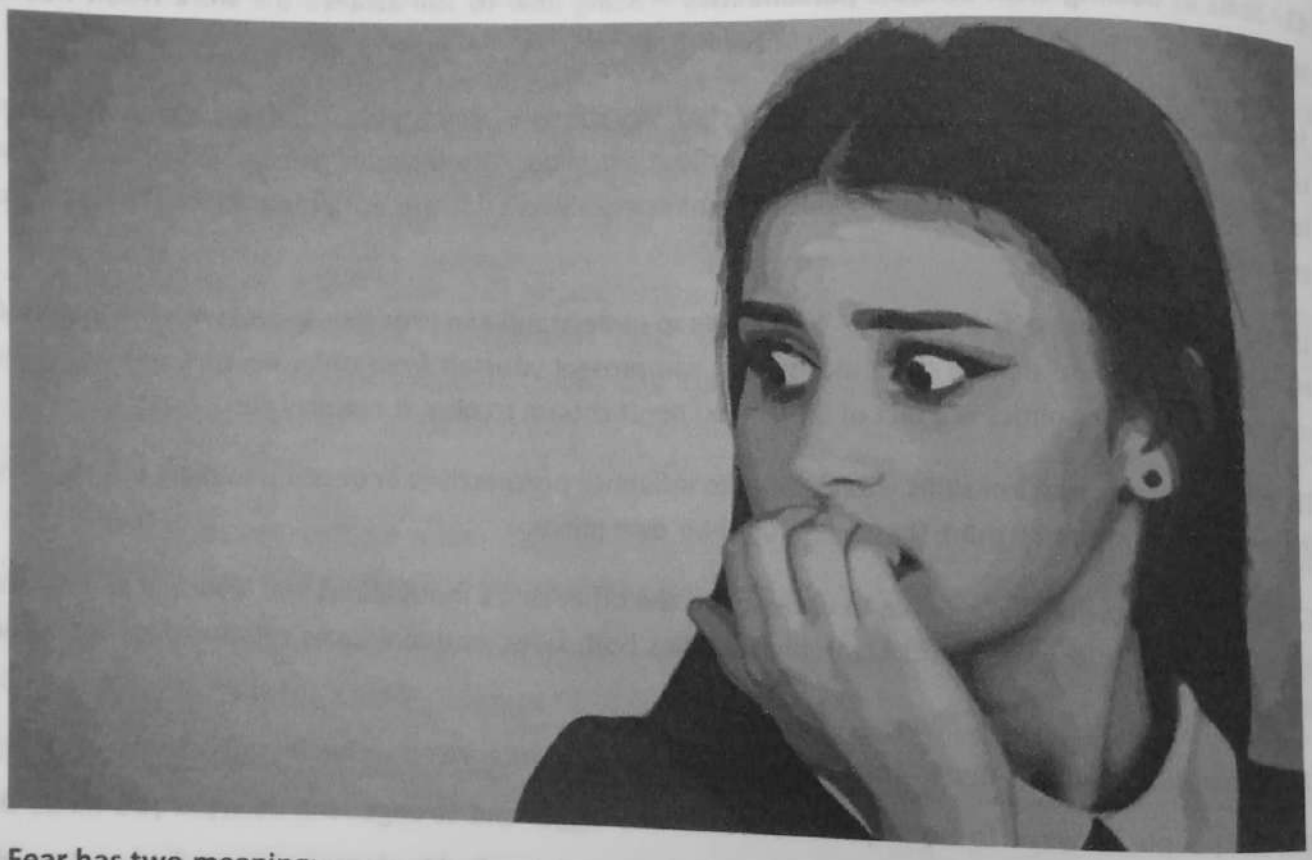
FEAR

Fear is a feeling induced by perceived danger or threat that occurs in certain types of organisms, which causes a change in metabolic and organ functions and ultimately a change in behavior, such as fleeing, hiding, or freezing from perceived traumatic events.



Fear has two meaning:

Forget Everything and Run

OR

Face Everything and Rise

The choice is yours.

- If you want to conquer your fear, don't sit home and think about it.

Go out and get busy.

SELF DEVELOPMENT – ETIQUETTE & MANNERS

Basic Examples of Good Manners and Etiquettes:

- Choose your words wisely and don't rush to comment about things you don't know much about. Being a good listener is often better than speaking. You don't need to have an opinion on everything.

- Think things out before you speak, especially if you are a person who may be poor at finding the right words to say. Don't start a sentence, with 'ums' and 'ers' in between, it seems awkward and you should try speaking to yourself in front of a mirror, it works! It increases your confident in speaking.

- Don't speak loudly. You will quickly lose respect if you do, as this can be seen as overbearing and rude. It can also make other people angry and upset with you before you even establish some kind of relationship with them. They will see you as a 'big mouth' who cannot be trusted with anything confidential. So practice turning your volume down if you tend to have a loud voice.

- Speak with respect to and of others. You can do this by avoiding negative remarks that may insult someone else. The general rule is- if you don't want someone to speak about you that way, you don't speak about them to others.

- Do not ever speak of bodily functions even if it is a casual conversation, such as using the bathroom or telling crude jokes, for this shows sign of immaturity and often creates a bad impression of you with your friends, family, and co-workers.

- Always respect older people and listen to them and learn. This applies to all elders and not just parents and grandparents.

- Using the terms 'Thank You', and 'You are Welcome' shows that you have good manners. People who lack manners do not use these terms.

- Hold open a door for anyone following you closely. This is a sign of a good manner and has never changed. There are no strict gender rules in this day and age.

- Speak highly of your parents respect them, even if there are things about them that you do not like. If you cannot do that, stay away from speaking about them at all. It looks bad to insult or speak badly of the people who brought you into this world or raised you. Don't wash dirty family laundry in public. It is negative and rude.

- Do not swear to use filth language and curse words. It is unprofessional! People who do this are usually very immature and have no self-control or respect for themselves and others!

Good manners are simply respect and consideration for others or being aware of the needs of others. They are the oil which lubricates the friction of interpersonal relations and creates a happy and successful society. So, Give Respect and Take Respect!

RESUME BUILDING

Resume Building

Creating a resume can be challenging when you start thinking about all the information you need to share with prospective employers. Your employment history, educational background, skills, and qualifications need to be presented in a way that will help you get picked for a job interview. Rather than a simple list of the jobs you have held, it's important to include information specific to the positions for which you're applying.

What's the easiest way to write a resume? If you look at resume building as a step-by-step process, it will be easier to do and much less overwhelming. Once you've created your first resume or refreshed your old one, you can simply tweak it to match it up with a job when you're applying for an open position.

Read on for how to build a resume, the components required in an interview-winning resume, examples of what to include in each section, how to format your resume, options for saving your document, and tips for writing a resume that will catch the attention of hiring managers.

COMMUNICATION SKILLS

Communication Skills

Communication is the act of conveying meanings from one entity or group to another through the use of mutually understood signs and semiotic rules.

Top 10 Communication Skills

1. Listening:

Being a good listener is one of the best ways to be a good communicator. No one likes communicating with someone who only cares about putting in her two cents and does not take the time to listen to the other person. If you're not a good listener, it's going to be hard to comprehend what you're being asked to do.

2. Nonverbal Communication:

Your body language, eye contact, hand gestures, and tone of voice all color the message you are trying to convey. A relaxed, open stance (arms open, legs relaxed), and a friendly tone will make you appear approachable and will encourage others to speak openly with you.

Eye contact is also important; you want to look the person in the eye to demonstrate that you are focused on the person and the conversation (however, be sure not to stare at the person, which can make him or her uncomfortable).

Also, pay attention to other people's nonverbal signals while you are talking. Often, nonverbal signals convey how a person is really feeling. For example, if the person is not looking you in the eye, he or she might be uncomfortable or hiding the truth.

3. Clarity and Concision:

Good verbal communication means saying just enough – don't talk too much or too little. Try to convey your message in as few words as possible. Say what you want clearly and directly, whether you're speaking to someone in person, on the phone, or via email. If you ramble on, your listener will either tune you out or will be unsure of exactly what you want. Think about what you want to say before you say it; this will help you to avoid talking excessively and/or confusing your audience.

4. Friendliness:

Through a friendly tone, a personal question, or simply a smile, you will encourage your coworkers to engage in open and honest communication with you. It's important to be nice and polite in all your workplace communications. This is important in both face-to-face and written communication. When you can, personalize your emails to coworkers and/or employees – a quick "I hope you all had a good weekend" at the start of an email can personalize a message and make the recipient feel more appreciated.

5. Confidence:

It is important to be confident in your interactions with others. Confidence shows your coworkers that you believe in what you're saying and will follow through. Exuding confidence can be as simple as making eye contact or using a firm but friendly tone. Avoid making statements sound like questions. Of course, be careful not to sound arrogant or aggressive. Be sure you are always listening to and empathizing with the other person.

6. Empathy:

Even when you disagree with an employer, coworker, or employee, it is important for you to understand and respect their point of view. Using phrases as simple as "I understand where you are coming from" demonstrate that you have been listening to the other person and respect their opinions.

7. Open-Mindedness:

A good communicator should enter into any conversation with a flexible, open mind. Be open to listening to and understanding the other person's point of view, rather than simply getting your message across. By being willing to enter into a dialogue, even with people with whom you disagree, you will be able to have more honest, productive conversations.

8. Respect:

People will be more open to communicating with you if you convey respect for them and their ideas. Simple actions like using a person's name, making eye contact, and actively listening when a person speaks will make the person feel appreciated. On the phone, avoid distractions and stay focused on the conversation.

9. Feedback:

Being able to appropriately give and receive feedback is an important communication skill. Managers and supervisors should continuously look for ways to provide employees with constructive feedback, be it through email, phone calls, or weekly status updates. Giving feedback involves giving praise as well – something as simple as saying "good job" or "thanks for taking care of that" to an employee can greatly increase motivation.

10. Picking the Right Medium:

An important communication skill is to simply know what form of communication to use. For example, some serious conversations (layoffs, changes in salary, etc.) are almost always best done in person.

BODY LANGUAGE

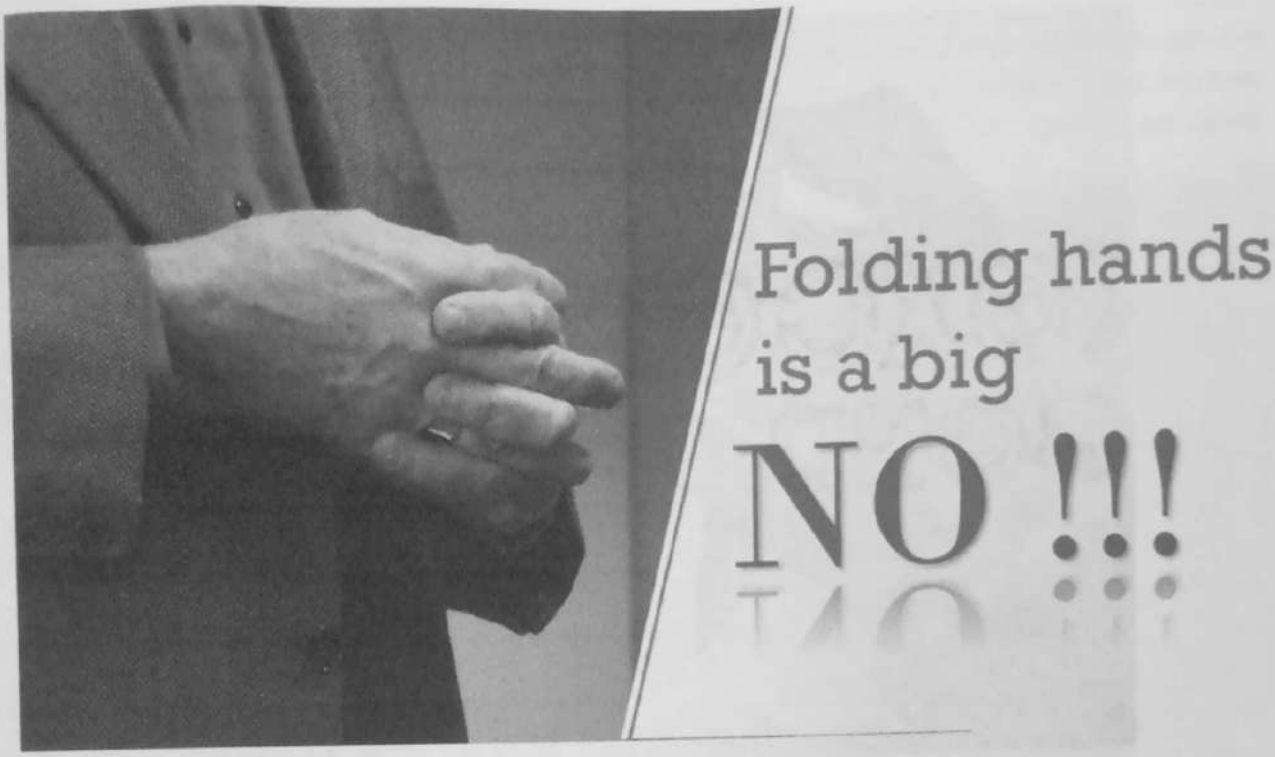
Body Language

Here we are going to discuss about 7 don'ts and 7 dos while you are on the stage delivering a presentation or speech to make sure your body language is as good as your content.

Don't Ever:

1) **Fold hands/arms**: It indicates that you are unenthusiastic about the speech or the presentation. You are not open to others and their ideas. Folding arms could imply that you may have gone into your shell and you are uncomfortable in the presence of others.

Scanned by CamScanner



2) **Look down or off into space**: You are on the stage with purpose. You are not there to talk to the ceiling or to the floor. If you look down or off into the space, it shows that you are not interested in the audience, or in the whole idea of being there.

3) **Jiggle legs**: Reason why people shake their legs is restlessness. Either you are unprepared or you just got bored of the situation. Either ways, you jiggle your legs. Better go prepared and add some humor to your presentation so that you don't let yourself and your audience get bored.

4) **Fidget with objects:** Clicking pens, playing with paper clips may show you as impatient, bored, nervous, and restless. Not just this, audience will end up seeing you fidgeting and will not pay attention to what is being said.

5) **Turn your back to the audience:** When you do it, you bore them. As a result, you lose them. You portray as if you don't care about them.

6) **Roll eyes:** This is a way of telling your audience that you don't respect them. Or that maybe you are lying. Of course, we are not saying that you are a liar. But you might come across as one if you do so.

7) Hold objects in front of your body: You are separating yourself from others. You immediately create a bridge between you and your audience when you cover your body. Your entire body is visible to the audience when you are standing. They can communicate well with a standing person. In case, you have to sit, make sure you don't cover your body with unnecessary stuff such as files or books in your hands. Just sit straight and talk.

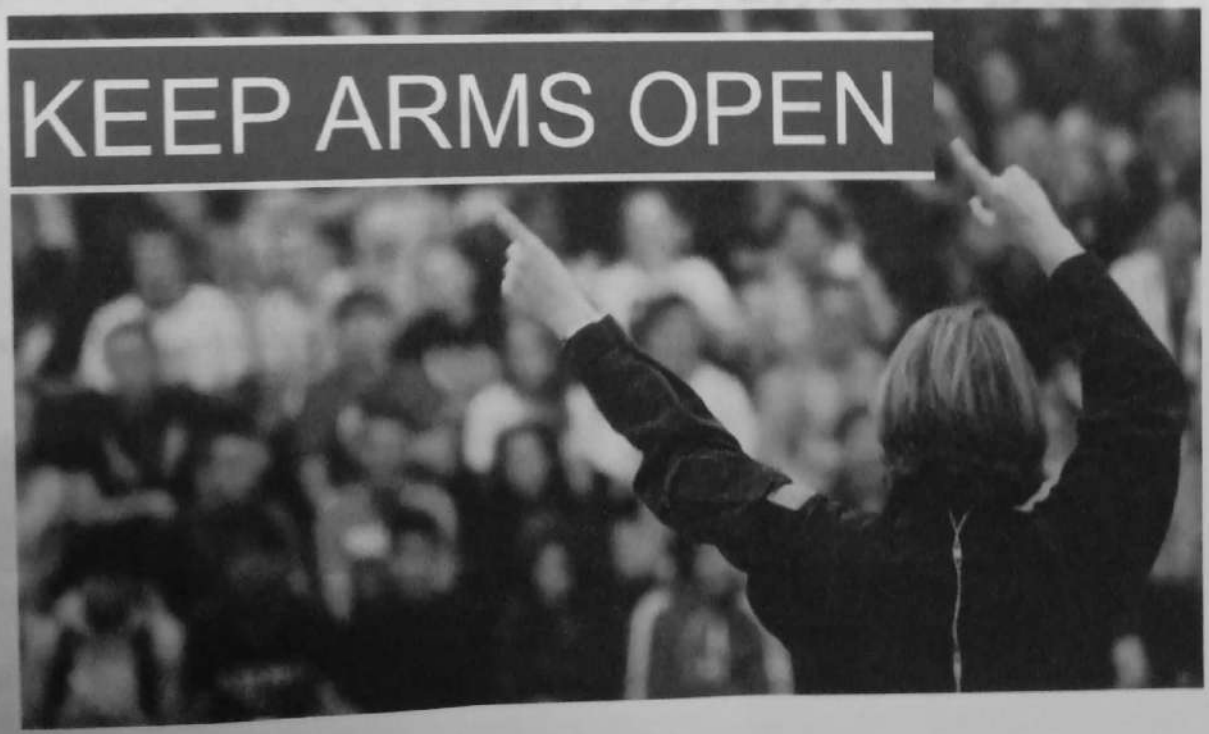
Always Do:

1) **Make eye contact:** Always make an eye contact with your audience. Eye contact represents that you are interested in the conversation. It shows that you are speaking information, showing attention and interest. When you look your audience in the eye, they will in turn pay more attention to you and to what you are saying because they will feel engaged and a part of your conversation.

2) **Open arms:** Keep your arms open. Open arms display that you are confident about your content. You have a confidence in your message. Also, you are open to new ideas. You are not a threat to your audience. You would like to indulge in the conversation with your audience.



Scanned by CamScanner

3) **Mobility:** A little movement is necessary during the presentation. Do not just standstill at one place. Use the stage while speaking to keep the environment active and positive. Walk towards the audience to encourage them to participate in the conversation.

4) **Face expressions:** Face expressions are an integral part of any speech. Face expressions alone can make your audience understand the meaning of the message. Let your emotions come out while saying each word. It shows that you mean them. Your audience will immediately connect with you.

5) **Power Posing:** Make your speech more effective by adopting power posing. This is not something you have to do whilst the speech is on. Try power posing before the speech for effective results. According to the social psychologist, Amy Cuddy, power posing can make us feel more powerful, strong and secured about ourselves. Simple postures such as "hands on our hips and arms in V" can boost our confidence level.

6) **Open palms or be hands on:** Talk with the palms open. It is a sign of honesty. Closed palms indicate that you are hiding something and come across as a threat to your audience. Avoid keeping hands in your pockets or by the side. Rather use hands gestures to emphasize your words.

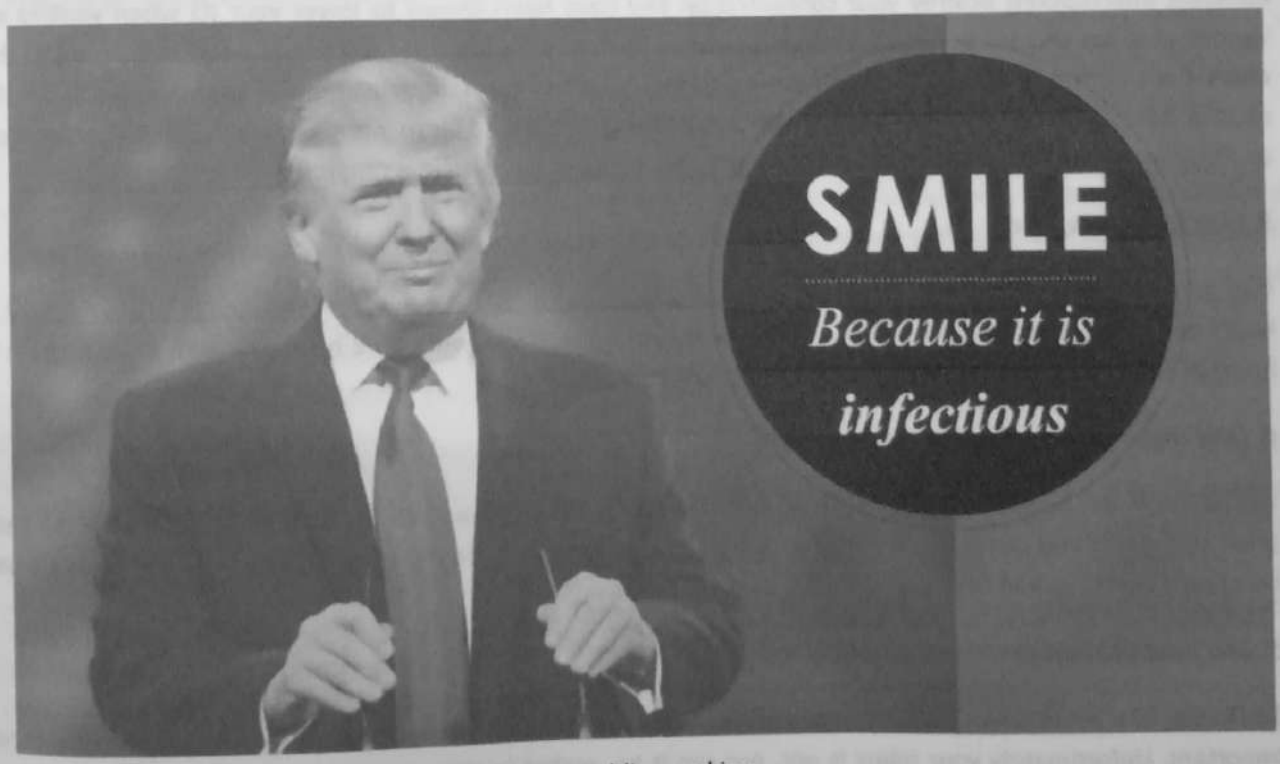
7) **Smile:** There is nothing better than smiling. It shows that a person is credible, confident, and trustworthy. It exudes positivity and charm about the person who is delivering a speech.



Adopt these body language tips to enhance your public speaking.

Now you are aware of what you should avoid doing on the stage and what you should always do to make your stage presence a hit.

And always remember to smile.

PRIORITY MANGEMENT & TIME MANAGEMENT

Priority Management & Time Management:

Time is beyond our control, and the clock keeps ticking regardless of how we lead our lives. Priority management is the answer to maximizing the time we have". That's where priority management comes in. Use these concepts to help you prioritize your work and get the right things done.

12 Top Time Management Tips

1. Start your day by looking at your calendar and your to-do list rather than your inbox.

This simple technique will ensure that you start your day in a pro-active rather than reactive mode. By determining up front what meetings you have on, and what tasks need to be completed today, you will make better decisions when you read your emails.

2. Turn off distractions and don't live your life by default.

Constant interruptions destroy your concentration and have been shown to lower your IQ when working on important tasks. Multi-tasking is a myth; if you need to deliver high quality work, you need to turn off all the distractions, including email alerts, and devote quality time to important activities. For example: Do you really need a 15 minute reminder of all calendar appointments? Instead, turn off the default, and choose what appointments need a reminder, and how long prior to the meeting an alert is required.

3. Plan for interruptions.

Ever get to the end of the day without achieving all you set out to do? The average 'knowledge worker' loses 2.1 hours per day to interruptions, and yet few people plan for it. If you work an 8 hour day, plan to accomplish 6 hours of work (less time in meetings and lunch of course).

4. Only check your email a few times per day.

You've heard this before - but this is the hardest habit for people to break. Doing so, however, is one of the best productivity gifts you can give yourself. You will be amazed at how much more you can achieve when you are not constantly checking, and reacting to, emails all day.

5. Don't use your inbox as your to-do list.

To-Do List 101: write down all the things you need to do, put them in order of priority and start with the most important. Unfortunately your inbox is not, nor can it be, sorted in this way, and most people tend to do the quick and/or easy things first to reduce the number of emails in their inbox. Your inbox should merely be a reception point to receive your mail in the same way your letterbox at home receives mail. When mail arrives, do something with it. All email clients have excellent built-in task management functionalities. Learn how to use yours so you can build meaningful, properly prioritized to-do lists.

Scanned by CamScanner

6. Prioritize your work based on the value it will add.

Apply the 80/20 rule to your workload so that you focus on the 20% of activities that will give you 80% of your results. Perfecting this will ensure that you are effective as well as being efficient.

7. Close your day.

Make an appointment with yourself every day, one hour before you go home, to reflect on what you have achieved that day. You may even want to keep a journal for that next performance appraisal. Then look at tomorrow and the next few days to see what meetings are coming up and what deadlines are approaching. Re-prioritize your to-do list so that you hit the ground running the next morning, and write down all the things that have popped up during the day that need to be done. When you get good at doing this you will go home feeling less anxious about the following day, and you will be more present for your family and friends. It will also stop you from waking up in the middle of the night suddenly remembering something you need to do.

8. Schedule time for important work.

If you don't take control of your calendar, someone else will. This is especially important if you work in an office where calendars are shared. If you have a high priority task that needs to be completed, block out time in your calendar to do it. That way, if someone wants to have an impromptu meeting, they will see you as busy.

9. Insist on an agenda for meetings.

Few things waste time more than a poorly planned meeting. If there is no agenda for a meeting you should refuse to go based on the fact that you (and the other participants) cannot prepare in advance. If there is no agenda, how do you know if you are needed for the whole meeting - or even if you are needed at all?

10. Apply the one-touch principle to email and paper.

When you touch a piece of paper or an email, make a decision on what you are going to do and when you are going to do it. Double handling actually triples the time taken to complete the task. View all the emails in your inbox that you marked as unread as a decision you failed to make. Instead, file information, transfer to to-do lists, delegate to someone else if necessary, and delete the rubbish.

11. Take time to rest and recuperate.

Countless studies have shown that the most productive people are the ones who take the time out to rest, exercise and recuperate. Starting earlier or skipping lunch may make you more productive on the odd occasion, but if you do this consistently you will experience more stress and burnout. Don't be embarrassed to take lunch or leave on time, because in the long run you will accomplish more than those who can't switch off. When you go on holiday, switch off completely. Don't be tempted to check your emails or check in with the office. Judge people on what they achieve, not on the hours they put in, because stress, anxiety and depression are all on the rise.

12. Manage other people's expectations.

If you respond instantly to emails, always have time for the drop-in visitor, or constantly drop everything for others, you are setting up an expectation that you will always act this way. Subconsciously, your colleagues will always expect you to behave like that, setting you up for disaster. Be selfish with your time and be conscious of the expectations you are creating with others.

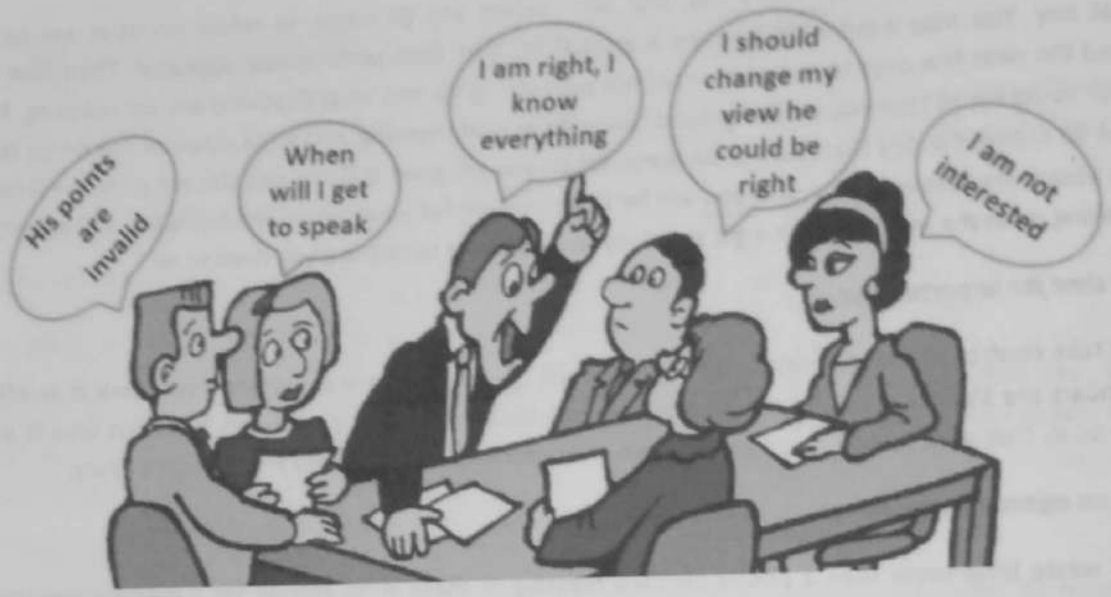
GROUP DISCUSSION



What is Group Discussion?

"Group" is a collection of individuals who have regular contact and frequent interaction and who work together to achieve a common set of goals. "Discussion" is the process whereby two or more people exchange information or ideas in a face-to-face situation to achieve a goal. The goal, or end product, maybe increased knowledge, agreement leading to action, disagreement leading to competition or resolution or perhaps only a clearing of the air or a continuation of the status-quo.

"Group Discussion", popularly labeled as GD, is a methodology used by an organization (company, institute, business school, etc.) to gauge whether the candidate has certain personality traits. GDs form an important part of the short-listing process for recruitment or admission in a company or institution. In this methodology, the group of candidates is given a topic or a situation, typically given some time to think about the same, and then asked to discuss it among themselves for a specific duration (which may vary from one organization to another). As in a football game, where you play like a team, passing the ball to each team member and aim for a common goal, GD is also based on teamwork, incorporating views of different team members to reach a common goal.

So, a group discussion refers to a communicative situation that allows its participants to share their views and opinions with other participants. It is a systematic exchange of information, views and opinions about a topic, problem, issue or situation among the members of a group who share some common objectives.

Why is a "GD" conducted?

Organizations conduct GDs to find out whether you possess the critical qualities/skills to contribute effectively to the goal accomplishment process. Group Discussions are held because business management is essentially a group activity and working with groups is the most important parameter of being successful as a manager. Apart

Scanned by CamScanner

from that, the candidates are evaluated on the basis of their communication skills, knowledge, leadership skills, listening skills, conceptualizing ability, etc.

A GD helps to achieve group goals as well as individual goals. The examiner can evaluate both the personality traits and group skills of candidates participating in a G.D. It is basically a situation test wherein a sample of a candidate's group worthiness and potential as a worker comes out quite explicitly.

Your mental diet largely determines your character and your personality and almost everything that happens to you in life.

What is a mental diet? Keep reading and I'll explain the importance...

When you feed your mind with positive affirmations, information, books, conversations, audio programs, and thoughts, you develop a more positive attitude and personality.

You become more influential and persuasive. You enjoy greater self-esteem. You learn how to be confident.

Those who use computers at work use the expression "G.I.G.O." or "Garbage in, Garbage out." But the reverse is also true, "Good in, Good out."

When you make a clear, unequivocal decision that you are going to take complete control over your mind, eliminate the negative emotions and thoughts that may have held you back in the past, and become a completely positive person, you can actually bring about your own personal transformation.

Mental fitness is like physical fitness. You develop high levels of self-esteem and a positive attitude with training and practice. Here are the seven keys to becoming a completely positive person:

+VE ATTITUDE & SELF CONFIDENCE

Positive Attitude & Self Confidence

A positive attitude is at the heart of optimistic and successful people. Successful and confident people have positive attitudes. Self-confidence is based on a belief that one's efforts and abilities will allow one to reach a goal.

1) Positive Affirmations

While speaking to yourself, speak positively; control your inner dialog. Use positive affirmations phrased in the positive, present, and personal tense. Here are some tips:

"I like myself!"

"I can do it!"

"I feel terrific!"

"I am responsible!"

We believe that fully 95% of your emotions are determined by the way you talk to yourself as you go throughout your day. The sad fact is that if you do not deliberately and consciously talk to yourself in a positive and constructive way, you will, by default, think about things that will make you unhappy, lower your self esteem, or cause you worry and social anxiety.

As we said before, your mind is like a garden. If you do not deliberately plant flowers and tend carefully, weeds will grow without any encouragement at all.

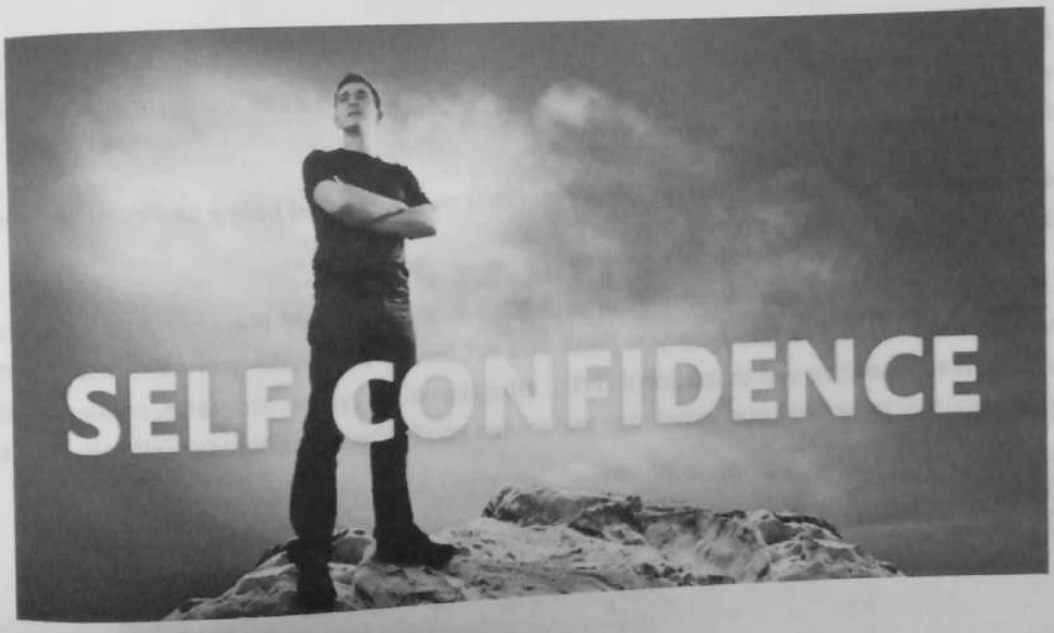
2) Positive Visualization

Perhaps the most powerful ability that you have is the ability to visualize and see your goals as already accomplished. Create a clear, exciting picture of your goal and your ideal life, and replay this picture in your mind over and over.

All improvement in your life begins with an improvement in your mental pictures. As you "see" yourself on the inside, you will "be" on the outside.



3) Positive People

Your choice of the people with whom you live, work, and associate will have more of an impact on your emotions and your success that any other factor. Decide today to associate with winners, with positive people, with people who are happy and optimistic and who are going somewhere with their lives.

Avoid negative people at all costs. Negative people are the primary source of most of life's unhappiness. Resolve that from today onward, you are not going to have stressful or negative people in your life.

4) Positive Mental Food

Just as your body is healthy to the degree to which you eat healthy, nutritious foods, your mind is healthy to the degree to which you feed it with "mental protein" rather than "mental candy." Read books, magazines, and articles that are educational, inspirational, or motivational.

Feed your mind with information and ideas that are uplifting and that make you feel happy and more confident about yourself and your world.

Listen to positive, constructive CDs and audio programs in your car and on your MP3 player or iPod. Feed your mind continually with positive messages that help you think and act better and make you more capable and competent in your field. Watch positive and educational DVDs, educational television programs, online courses, and other uplifting material that increases your knowledge and makes you feel good about yourself and your life.

5) Positive Training And Development

Almost everyone in our society starts off with limited resources, sometimes with no money at all. Virtually all fortunes begin with the sale of personal services of some kind. All the people who are at the top today were once at the bottom, and sometimes they fell to the bottom several times.

The miracle of lifelong learning and personal improvement is what takes you from rags to riches, from poverty to affluence, and from underachievement to success and financial independence.

As Jim Rohn said, "Formal education will make you a living; self-education will make you a fortune."

When you dedicate yourself to learning and growing and becoming better and more effective in your thoughts and actions, you take complete control of your life and dramatically increase the speed at which you move upward to greater heights.

6) Positive Health Habits

Take excellent care of your physical health and wellness. Resolve today that you are going to live to be eighty, ninety, or one hundred years old and still be dancing in the evenings. Eat healthy foods, natural and nutritious, and eat them sparingly and in proper balance. A nutritional diet will have an immediate, positive effect on your thoughts and feelings.

Resolve to get regular exercise, at least two hundred minutes of motion per week, walking, running, swimming, bicycling, or working out on equipment in the gym. When you exercise on a regular basis, you feel happier and healthier and experience lower levels of stress and fatigue than a person who sits on the couch and watches television all evening.

Especially, get ample rest and relaxation. You need to recharge your batteries on a regular basis, especially when you are going through periods of stress or difficulty.

Vince Lombardi once said, "Fatigue makes cowards of us all."

Some of the factors that predispose us to negative emotions of all kinds are poor health habits, sleep deprivation, lack of exercise, and nonstop work. Seek balance in your life.

7) Positive Expectations

Practicing the Law of Attraction is one of the most powerful techniques you can use to become a positive person and to ensure positive outcomes and better results in your life. Your expectations become your own self-fulfilling prophesies.

Whatever you expect, with confidence, seems to come into your life. Since you can control your expectations, you should always expect the best.

Expect to be successful.

Expect to be popular when you meet new people. Expect to achieve great goals and create a wonderful life for yourself. When you constantly expect good things to happen, you will seldom be disappointed.

MOTIVATION SKILLS & PERSONALITY

Motivation Skills & Personality

What Are Motivational Skills?

Motivational skills in the workplace can be defined as actions or strategies that will elicit a desired behavior or response by a stakeholder. Motivational tactics will vary given the style of the motivator, their relationship with the target of the motivation, and the personality of the individual to be motivated.

Steps in the Motivational Process

1. Assessing the preferences and personality characteristics of the individual or group to be motivated.
2. Defining motivational strategies appropriate for that target.
3. Conveying expectations for performance to or achieving desired outcomes from the object of the motivation.
4. Communicating benefits, rewards, or sanctions if expectations are (or are not) met.
5. Providing feedback regarding progress or lack of progress towards desired outcomes.
6. Addressing problems or obstacles that are limiting success.
7. Providing rewards for desired outcomes.
8. Issuing warnings prior to enacting sanctions.
9. Publicly recognizing others who have responded in the desired manner.

Examples of Motivational Skills (A through Z)

A - I

- Allocating professional development resources to the most motivated staff.
- Allowing team members personal problem-solving autonomy instead of micromanaging them.
- Asking for input regarding departmental objectives.
- Assigning desirable projects to staff who are highly engaged.
- Awarding a performance-based bonus or salary increase to employees who achieve the right results.
- Being open to discuss, in a constructive and non-judgmental manner, employee concerns.
- Continually noticing the contributions of staff and conveying appreciation.
- Creating a pleasant and ergonomic workplace for your team members.

- Drafting a budget proposal for additional staff to management which emphasizes how revenues would be enhanced.
- Empowering staff to choose the way in which they will address goals whenever possible.
- Focusing on ways to learn from rather than punish mistakes.
- Giving to office collections to support favorite staff charities, celebrate birthdays, or sympathize with personal family loss.

Helping to build bridges across staff and management levels to heighten interconnectedness, foster collaboration, and build a shared sense of mission.

- Implementing a public tally board to record comparative sales by different members of the sales team.
- Identifying and acknowledging the unique talents and contributions of team members.

J - Z

- Joining informal "water cooler" discussions to gain understanding of staff interests and personalities.
- Keenly assessing the interest of staff in various tasks and projects.
- Launching voluntary health and wellness programs.
- Limiting the length of staff meetings by sticking to a strict agenda and concluding discussions as quickly as possible.
- Meeting with a subordinate to set performance goals.
- Mentioning positive aspects of your supervisor's leadership approach to her boss at an informal gathering.
- Mentoring new personnel in an engaging and supportive fashion.
- Noticing and quietly thanking peers for unsolicited acts of both project / work initiative and of interpersonal kindness.
- Offering to support colleagues or subordinates who are under stress.
- Providing in person testimonials by potential beneficiaries at a presentation to a grant funding organization.
- Quarterly implementing team-building workshops to increase collaboration, mutual respect, and project ownership.
- Recognizing the contributions of key donors in public communications.
- Sending a note to an IT staff member's boss after she has helped with a successful implementation.
- Taking a strong departmental contributor to lunch and thanking them for their efforts.
- Thanking a supervisor for their support.

- Utilizing rising technologies to streamline work processes, increase efficiency, and reduce caseloads.
- Validating the individual progress of your subordinates in assuming greater levels of responsibility.
- Warning a subordinate of the consequences for continued lateness.
- Writing a LinkedIn recommendation for a helpful business partner.
- Examining your own personal communications and work style to identify better ways to motivate others and lead by example.
- Yielding control – and ownership - of various project stages to subordinates who deserve the opportunity to lead others.
- Zeroing in on opportunities to increase staff engagement and accountability.

1. Good nutrition is important for proper muscle development.
2. The company offers many opportunities for professional development.
3. The software is still in the early stages of development.
4. I try to keep up with the latest developments in computer technology.

The Five Golden Rules

1. Set goals that motivate you

When you set goals for yourself, it is important that they motivate you: this means making sure that they are important to you, and that there is value in achieving them. If you have little interest in the outcome, or they are irrelevant given the larger picture, then the chances of you putting in the work to make them happen are slim. Motivation is key to achieving goals.

Set goals that relate to the high priorities in your life. Without this type of focus, you can end up with far too many goals, leaving you too little time to devote to each one. Goal achievement requires commitment, so to maximize the likelihood of success, you need to feel a sense of urgency and have an "I must do this" attitude. When you don't have this, you risk putting off what you need to do to make the goal a reality. This in turn leaves you feeling disappointed and frustrated with yourself, both of which are de-motivating. And you can end up in a very destructive "I can't do anything or be successful at anything" frame of mind.

Scanned by CamScanner

7. Set SMART Goals

You have probably heard of SMART goals already. But do you always apply the rule? The simple fact is that for goals to be powerful, they should be designed to be SMART. There are many variations of what SMART stands for, but the essence is this – goals should be:

- Specific.
- Measurable.
- Attainable.
- Relevant.
- Time Bound.

Set Specific Goals

Your goal must be clear and well defined. Vague or generalized goals are unhelpful because they don't provide sufficient direction. Remember, you need goals to show you the way. Make it as easy as you can to get where you want to go by defining precisely where you want to end up.

Set Measurable Goals

Include precise amounts, dates, and so on in your goals so you can measure your degree of success. If your goal is simply defined as "To reduce expenses" how will you know when you have been successful in the months to come if you have a 1 percent reduction or in two years' time when you have a 10 percent reduction? Without a way to measure your success you miss out on the celebration that comes with knowing you have actually achieved something.

Set Attainable Goals

Make sure that it's possible to achieve the goals you set. If you set a goal that you have no hope of achieving, you will only demoralize yourself and erode your confidence.

However, resist the urge to set goals that are too easy. Accomplishing a goal that you didn't have to work hard for can be unfulfilling at best, and can also make you fear setting future goals that carry a risk of real achievement. By setting realistic yet challenging goals, you hit the balance you need. These are the types of goals that require you to "raise the bar" and they bring the greatest personal satisfaction.

Set Relevant Goals

Goals should be relevant to the direction you want your life and career to take. By keeping goals aligned with this, you'll develop the focus you need to get ahead and do what you want. Set goals scattered and inconsistent goals and you'll frustrate your time – and your life – away.

Set Time-Bound Goals

Your goals must have a deadline. Again, this means that you know when you can celebrate success. When you are working on a deadline, your sense of urgency increases and achievement will come that much quicker.

Scanned by CamScanner

3. Set Goals in Writing

The physical act of writing down a goal makes it real and tangible. You have no excuse for forgetting about it. As you write, use the word "will" instead of "would like to" or "might." For example, "I will reduce my operating expenses by 10 percent this year," not "I would like to reduce my operating expenses by 10 percent this year." The first goal statement has power and you can "see" yourself reducing expenses, the second lacks passion and gives you an excuse if you get sidetracked.

Post your goals in visible places to remind yourself every day of what it is you intend to do. Put them on your walls, desk, computer monitor, bathroom mirror or refrigerator as a constant reminder.

4. Make an Action Plan

This step is often missed in the process of goal setting. You get so focused on the outcome that you forget to plan all of the steps that are needed along the way. By writing out the individual steps, and then crossing each one off as you complete it, you'll realize that you are making progress towards your ultimate goal. This is especially important if your goal is big and demanding, or long-term.

5. Stick With It!

Remember, goal setting is an ongoing activity, not just a means to an end. Build in reminders to keep yourself on track, and make regular time-slots available to review your goals. Your end destination may remain quite similar over the long term, but the action plan you set for yourself along the way can change significantly. Make sure the relevance, value, and necessity remain high.

CAREER PLANNING

Career Planning

Five Steps to Career Planning

Step 1: Reflection and Self-Evaluation

The first step in career planning should be to gather information about yourself to assist in making a decision about a career.

Step 2: Exploration

The second step in career planning is to explore and research your options. Exploring takes your self-assessment a step further by looking at your personal interests, skills, values, and work-life needs and narrowing down areas of possibilities.

Step 3: Decision-Making and Goal Setting

After having completed your self-assessment and explored your options you should be ready to make some career decisions. The question now is how you will decide.

Step 4: Gaining Experience

Career related experience can help you develop the skills, abilities and knowledge to solidify your career goals.

Step 5: Implementation

This is the step in the process where you implement what you have learned and move forward towards a new job or more advanced education. You should also continue to evaluate your options and make adjustments as needed.

These 10 interview tips will teach you how to answer interview questions and convince the hiring manager that you are the one for the job.

Practice good nonverbal communication

It's about demonstrating confidence: standing straight, making eye contact and connecting with a firm handshake. That first nonverbal impression can be a great beginning—or quick ending—to your interview.

Dress for the job or company

Today's casual dress codes do not give you permission to dress as "they" do when you interview. It is important to know what to wear to an interview and to be well-groomed. Whether you wear a suit or something less formal depends on the company culture and the position you are seeking. If possible, call to find out about the company dress code before the interview.

Listen

From the very beginning of the interview, your interviewer is giving you information, either directly or indirectly. If you are not hearing it, you are missing a major opportunity. Good communication skills include listening and letting the person know you heard what was said. Observe your interviewer, and match that style and pace.

Don't talk too much

Telling the interviewer more than he needs to know could be a fatal mistake. When you have not prepared ahead of time, you may ramble when answering interview questions, sometimes talking yourself right out of the job. Prepare for the interview by reading through the job posting, matching your skills with the position's requirements and relating only that information.

Don't be too familiar

The interview is a professional meeting to talk business. This is not about making a new friend. Your level of familiarity should mimic the interviewer's demeanor. It is important to bring energy and enthusiasm to the interview and to ask questions, but do not overstep your place as a candidate looking for a job.

Use appropriate language

It's a given that you should use professional language during the interview. Be aware of any inappropriate slang words or references to age, race, religion, politics, or sexual orientation—these topics could send you out the door very quickly.

Don't be cocky

Attitude plays a key role in your interview success. There is a fine balance between confidence, professionalism and modesty. Even if you're putting on a performance to demonstrate your ability, overconfidence is as bad, if not worse, as being too reserved.

Take care to answer the questions

When interviewers ask for an example of a time when you did something, they are asking behavioral interview questions, which are designed to elicit a sample of your past behavior. If you fail to relate a specific example, you not only don't answer the question, but you also miss an opportunity to prove your ability and talk about your skills.

Ask questions

When asked if they have any questions, most candidates answer, "No." Wrong answer. Part of knowing how to interview is being ready to ask questions that demonstrate an interest in what goes on in the company. Asking questions also gives you the opportunity to find out if this is the right place for you. The best questions come from listening to what you're asked during the interview and asking for additional information.

Don't appear desperate

When you interview with the "please, please hire me" approach, you appear desperate and less confident. Reflect the three Cs during the interview: cool, calm, and confident.

PSYCHOMETRIC TEST

What is a Psychometric Test?

Psychometric tests are often used as part of the recruitment process and are a way for employers to assess your intelligence, skills and personality. Recruiters use the results from these tests to determine whether you would be a suitable match for the company to which you are applying.

The tests are structured to accurately evaluate your capacity to work with others, process information and cope with the stresses of the job. The vast majority of psychometric tests are now taken online, though very occasionally an employer may use a paper test.

A Brief History of Psychometric Tests

Psychometric tests are by no means a new concept; they have been used since the early 20th century, when they were originally used only for the purposes of educational psychology. It was in 1905 that Alfred Binet introduced the first 'intelligence test'.

They have since evolved to become a common feature of the selection process - particularly within large, competitive organizations, which prefer these types of test as they can assess each candidate on their acquired skills rather than educational background.

Why And When Are Psychometric Tests Used?

Graduate recruiters in particular like to use psychometric tests for the following reasons:

- They are objective and impersonal, allowing candidates to be compared in ability terms without unconscious bias;
- They help to make the recruitment process more efficient and can represent substantial HR costs;
- They are proven to be reliable indicators of future job performance.

The tests may appear at any stage in the recruitment process but usually you will undertake the test at one of these three stages:

1. Immediately after you submit your application form;
2. As an add-on to your interview;
3. Immediately before or after your actual interview.

What do Psychometric Tests Measure?

The term 'psychometric' is coined from the Greek words for mental and measurement. There are three main areas that the tests explore: your capabilities, aptitude for the job, and to determine whether your personality fits in with the vision of the organisation you are hoping to join. Essentially, the tests are looking to evaluate your intelligence, aptitude and personality, as well as how you handle pressure and your working style.

Psychometric tests are designed to measure your capability, aptitude and personality.

What are the Different Types of Psychometric Test?

As explained further below, there are essentially three categories: aptitude tests, skills tests and personality tests. Let's examine each in turn.

Aptitude Tests

Aptitude tests aim to assess a specific or general set of skills, though this often depends on the type of job that you are applying for. Categories found within this group include:

- Numerical reasoning test. Used to identify how you interpret data, often via a combination of written and statistical information presented in reports, graphs or charts. This can also be used to assess basic mathematical abilities. Try a free sample test below.
- Verbal reasoning test. Used as a way to determine your ability to evaluate detailed written information so as to make an informed decision. Try a free sample test below.
- Inductive reasoning test. These require you to identify trends or patterns, typically using diagrammatic information. Try a free sample test below.
- Diagrammatic reasoning test. These assess your capacity for logical reasoning, using flowcharts and diagrams. Try a free sample test below.

- Logical reasoning test. Aims to evaluate your skills in reaching a conclusion. You may be provided with some information and then asked to make a decision on what you have been provided with. As such, these tests are also often known as deductive reasoning tests.

- Error checking test. Assesses your ability to quickly identify any errors in complex data sets such as codes, or combinations of alpha-numeric characters.

The type of test that you will have to undertake will be determined by the job type and sector. For example, inductive or logical reasoning assessments are used to evaluate candidates applying for jobs in science, IT or other roles where advanced technical skills may be needed. These tests usually comprise of multiple-choice questions and a specified time frame in which to complete them. Inductive testing can result in the identification of new solutions and strategies to solve the issue, which is why these types of tests are used in many firms who specialize in technological innovation.

As with any type of recruitment related test, it is always recommended that you familiarize yourself with the process so that you know what to expect and are adequately prepared. Psychometric tests are quite formal and impersonal but there are many ways in which you can practice and prepare.

Skills Tests

Skills tests represent a way for employers to evaluate how quickly you can learn a new skill to competently carry out the job you are applying for. Depending on the job you are hoping to secure, the aptitude test may include something such as designing a basic web page (if you are applying to be a designer) or a financial modeling task (if you are applying for a quantitative role in finance).

Both capability and skills tests are assessed through paper-based exercises consisting of multiple-choice questions completed under exam conditions. Increasingly, psychometric tests are completed online using specialist systems that removes the requirement for a paper-based test.

Personality Tests

Personality assessments enable employers to evaluate your suitability based on your behavior and the way in which you approach your work. This will be used to determine how well you will fit into the organization and the culture of the business. Your responses will often be cross-referenced with those of a top-performing employee or successful manager, which will be an indication as to whether you share the same characteristics.

Employers look at many factors during the recruitment process, from your knowledge and experience through to your aptitude in areas such as decision making and teamwork. Increasingly, they will use personality tests as a way to determine if you have the right attitude and personality to fit in with the company's culture and vision.

Myers Briggs is one of the most commonly used personality tests. After progressing through a series of questions about how you would feel or act in a given scenario, you will be assigned to one of sixteen personality types based on your responses. Employers then review this personality type to see if you would fit in with their organizational values. There is rarely a time limit, as they are looking for you to answer the questions honestly (though it's worth having a sense of the job description and the employer needs in the back of your head as you go along).

Programming In Java

With the growth of Information and Communication Technology, there is a need to develop large and complex software. Further, those software should be platform independent, Internet enabled, easy to modify, secure, and robust. To meet this requirement object-oriented paradigm has been developed and based on this paradigm the Java programming language emerges as the best programming environment. Now, Java programming language is being used for mobile programming, Internet programming, and many other applications compatible to distributed systems. This course aims to cover the essential topics of Java programming so that the participants can improve their skills to cope with the current demand of IT industries and solve many problems in their own filed of studies.

- Registration url: Announcements will be made when the registration form is open for registrations.
- The online registration form has to be filled and the certification exam fee needs to be paid. More details will be made available when the exam registration form is published. If there are any changes, it will be mentioned then.
- Please check the form for more details on the cities where the exams will be held, the conditions you agree to when you fill the form etc.

CRITERIA TO GET A CERTIFICATE

- Average assignment score = 25% of average of best 8 assignments out of the total 12 assignments given in the course.
- Exam score = 75% of the proctored certification exam score out of 100
- Final score = Average assignment score + Exam score

YOU WILL BE ELIGIBLE FOR A CERTIFICATE ONLY IF AVERAGE ASSIGNMENT SCORE >=10/25 AND EXAM SCORE >= 30/75.

- If one of the 2 criteria is not met, you will not get the certificate even if the Final score >= 40/100.
- Certificate will have your name, photograph and the score in the final exam with the breakup.It will have the logos of NPTEL and IIT Kharagpur. It will be e-verifiable at nptel.ac.in/noc (http://nptel.ac.in/noc).

- Only the e-certificate will be made available. Hard copies are being discontinued from July 2019 semester and will not be dispatched

REPORT ON SEMINAR ON "TAMILNADU PUBLIC SERVICE COMMISSION EXAMINATION PREPARATION STRATEGY"

The Department of Computer Science and Engineering organized a Seminar on **"Tamilnadu Public Service Commission Examination Preparation Strategy"** for Computer Science and Engineering Students, on **08th March 2019 at 10:00 A.M.** The resource persons is **Mr.Sampath T, Managing Director, Success Academy** Coimbatore.

The program started with the prayer song. The welcome address was given by **Dr.K.Geetha**, Head of the Department of Electrical and Electronics Engineering. The Principal, **Dr.G.Ramesh** felicitated **Mr.Sampath T** with a bouquet and **Dr.G.Rajiv Suresh Kumar**, HOD of Computer Science and Engineering felicitated **the chief guest** with a memento.

The chief guest first gave an introduction about the subject, which gave everyone a clear view about the same. The earlier you learn ,the easier it would be for you to choose," with this motto he started this lecture to make the students aware about the preparation for the prestigious civil services and Tamilnadu Public Services Commission association with Success IAS Academy. The seminar commenced with the question of "Why to opt for TNPSC?", which was proceeded with the discussion on the pattern of the exams to enhance the knowledge of the students. Further, it was highlighted that there has been a considerable decrease in the number of aspirants from Tamilnadu for civil services because of the old pattern of studies and thus a solution was given to increase the number with the help of Success IAS Academy. Progressing towards the end, Mr.Sampath T's inspirational words echoed in the seminar hall with the motivational message of "Grab the opportunity, it's now or never!"

Mr.K.Sivakumar, Assistant Professor, Department of Computer Science and Engineering concluded with a vote of thanks.

The Petroleum Engineering Department of JCT College of Engineering and Technology, Pichanur, Coimbatore has organized 10 days GATE Coaching classes for our department students from 7.01.19 to 25.01.19.

Dr Venkateshbabu Head of the department welcomed the gathering

The following Subjects are handled in Gate Coaching Classes.

Engg Mathematics	Petroleum geology
Heat Transfer	Petroleum products
Mass Transfer	Fluid solid operations
Process Calculations	Petroleum equipment design
Well Logging	Drilling Technology
Petroleum refinery	OnShore Off shore technology

The GATE coaching classes went a great success under the support of our department Faculty members and advice of Dr.G.Ramesh, our principal.

In this juncture, we thank our Shri.R.Durga Shankar, Secretary of our JCT College of engineering and technology, for his moral enragement and support.

TÜV AUSTRIA CERTIFIED

REPORT ON SEMINAR ON "TAMILNADU PUBLIC SERVICE COMMISSION EXAMINATION PREPARATION STRATEGY"

The Department of Petroleum Engineering organized a Seminar on **"Tamilnadu Public Service Commission Examination Preparation Strategy"** for Computer Science and Engineering Students, on **08th March 2019 at 10:00 A.M.** The resource persons is **Mr.Sampath T, Managing Director, Success Academy** Coimbatore.

The program started with the prayer song. The welcome address was given by **Dr.K.Geetha**, Head of the Department of Electrical and Electronics Engineering. The Principal, **Dr.G.Ramesh** felicitated **Mr.Sampath T** with a bouquet and **Dr.S.Venkateshbabu**, HOD of Petroleum Engineering felicitated **the chief guest** with a memento.

The chief guest first gave an introduction about the subject, which gave everyone a clear view about the same. The earlier you learn ,the easier it would be for you to choose," with this motto he started this lecture to make the students aware about the preparation for the prestigious civil services and Tamilnadu Public Services Commission association with Success IAS Academy. The seminar commenced with the question of "Why to opt for TNPSC?", which was proceeded with the discussion on the pattern of the exams to enhance the knowledge of the students. Further, it was highlighted that there has been a considerable decrease in the number of aspirants from Tamilnadu for civil services because of the old pattern of studies and thus a solution was given to increase the number with the help of Success IAS Academy. Progressing towards the end, Mr.Sampath T's inspirational words echoed in the seminar hall with the motivational message of "Grab the opportunity, it's now or never!"

Mr.K.Sivakumar, Assistant Professor, Department of Computer Science and Engineering concluded with a vote of thanks.

REPORT ON SHORT TALK AND PRESENTATION

English Literature Club conducted training on the short talk and presentation for all the students on 15.11.2018. More than 300 Students have stepped into the Learning Portal of JCTCET. In this training, important traits on the general topics, themes, specific topic, and technical topics were heighted and taken for discussion. Students actively participated and thus the short talk and presentation was very helpful for all the students to gain the platform for the Engineering foundation. And also it acted as a recreational course from their higher education to Academics.

Under the heading short talk and presentation students were given time to speak about four topics respectively as talk on general topics, talk on themes, talk on specific topic and talk on technical topics. Talk on general topics refers to general things and objects under which the student should talk generally. Themes refer to the subject of a talk, piece of writing, exhibition etc. moreover it is an idea that recurs in or pervades a work of art or literature. Hence the students were asked to write using their own mind about their interested points of writing. In addition to this, students were asked to speak and present about specific topics in their own writing. In this process, a particular / specific topic will be given and hence the students should talk and present on it.

A short presentation with illustrations has given by the student. On the other hand, students were also spoken about technical topics from their various engineering streams. Thus, using these four topics, students have shown their abilities and talents to enrich their speaking skills and presentation.

REPORT ON GROUP DISCUSSION

English literature club has conducted soft skill training program in JCT College of engineering and technology for the first year students on 25.03.2018. The main objective of the group discussion is to enrich the speaking skills, required to get jobs in various fields. The role of the group discussion was divided into four categories as group discussion practice, group discussion with a case-practice, mock group discussion practice, group discussion in different groups.

A practice of group discussion with more live videos and ensamples were shown to the students. A demo on how to conduct a group discussion was also conducted. In the first category, a practice on the techniques and methods of group discussion is portrayed. In the next category a group discussion with a case practice is given. In that particular case will be given and hence the students should have a group discussion on it. In the third category, mock group discussion was practiced. Here all the steps related to mock practice was entertained. Finally group discussion with different groups has also conducted. Different ideas were discussed using these different groups.

Thus the role played by the group discussion among the students was very beneficial with respect to acquire vocabulary and speaking skills.

REPORT ON POSTER PRESENTATIONS

The Department of English conducted English literature club titled poster presentations in JCT College of Engineering And Technology, Coimbatore on 10.11.17. During the presentations enthusiastic topics like picture presentations, theme presentations, on the spot topic picturisation and strategies for presentation were enrolled. All the students tried their efforts during the poster presentation. All the four topics were dealt differently based on different resources. All the students were happy delivering their own poster presentations thus in other way, expressing their talents.

Picture presentation was held using some pictures and the students were given time to present based on the descriptions found in the picture. During theme presentations particular student has to deal with particular theme and thus the message is conveyed. On the other hand, the other topic like on the spot topic picturisation was conducted based on the topic in the picture. It was dealt based on the spot. In spite of all these, the strategies for presentation were also trained to the students to enrich how to develop the presentation activities. Thus all the four poster presentations helped the students to develop their speaking skills.

REPORT ON SOFT SKILLS

English literature club has conducted soft skill training program in JCT College of engineering and technology for the first year students on 21.03.2018. Hard and soft skill is important in everyone's life. But in fact comparing to hard skill, soft skill is very essential in one's life. Various soft skills were discussed among them the main important soft skills that included are leadership traits, teamwork carrier and life planning, self image and time management.

The leadership traits brought the points about the skills required for a leader to develop the motivational aspects. The teamwork carrier brought the points related to the importance of achieving a success by forming a team. As it's said that any carrier can be successful only by teamwork, not by individual. Hence the importance of teamwork carrier was portrayed to the students. With addition to these, self image was also displayed among the students. During this process, the point of how one's image is self respected was discussed. Finally the topic of time management was discussed. Students were taught about the important concepts of time like time is very precious. Time once lost will never regain. They were also trained to have a plan for every activity and to follow the punctuality.

Thus the students were benefitted on the training of soft skills, which in turn helps them to place themselves in corporate atmosphere and also helps them to get benefitted from more job opportunities during interview.

INTERNATIONAL YOGA DAY CELEBRATION

International Day of Yoga or commonly known as Yoga Day, is celebrated on 21st June every year since its inception in 2015. Yoga is a physical, mental and spiritual practice originated in Bharat or India.

The 2nd International Yoga Day was celebrated on 21 June 2016, Tuesday at JCT College of Engineering and Technology with great enthusiasm and vigour. Almost 200 participants took part in that event. Dr.G.Ramesh Principal of our college proceeded and taught over the program Students, faculty members also participated in the event. Participants of all age groups participated in the event with great enthusiasm.

The Yoga session started exactly at 7 am with Prayer, and systematic practice of different 'ASANAS" of standing, sitting and laying positions (both lying on back andreverse) smoothly changing in succession under the instructions of Yoga teacher and supervision of trained Volunteers. The Yoga teacher also narrated the usefulness of different "Asanas" as a precautionary measure, in curing many Diseases and the usefulness of Yoga in the overall wellbeing of a human being.

The entire "YOGABHYAS" lasted for an hour and ended at 8 am with a "Sanskrit Shloka" and Oath by all the participants that they will continue to practice Yoga for keeping their Body and mind in healthy, stress-free and cheerful condition.

INTERNATIONAL YOGA DAY CELEBRATION

The International Day of Yoga was celebrated in the college on Friday, 23 June 2017. The students, faculty members, NSS volunteers of the college participated in the event around 300 participants assembled for the practice.

Thiru.Karuppuswamy and Thirumathi Steffi, the co-ordinates of Sai Guru Trust were conducted and taught Yoga with demonstration to the faculty members and students each yogasana and briefly explained the benefits. The participants followed the demonstration and practiced each yogasana with involvement .The practice ended with relaxation.

Dr.G.Ramesh Principal of our college felicitated the event. He underlined the fact that yoga unites the body and mind. He added that in fast-paced life style of the present day, yoga is much needed for everyone to bring about that calm and equipoise in the mind to take the correct and righteous decisions and lead a happy and fulfilling life. He rightly pointed out youth can stay on the right path by regular practices of even simple yoga and achieve their goals amidst the distractions and challenges.

The Science and humanities department of the college made the arrangements for the celebration . The celebration was concluded with chanting of the world blessing song and Shanthi mantra. Sample photos are given in a separate file.
